

Applications for an Adjunct CEF Investigator Status

The Cluster of Excellence Frankfurt “Macromolecular Complexes” (CEF-MC) invites applications from researchers in Frankfurt for CEF Adjunct Investigatorships.

Adjunct CEF Investigators will complement the faculty of CEF Investigators filling the new positions within the Cluster. Adjunct CEF Investigators will receive substantial, flexible research funding of up to € 100,000 per year, for an initial 2.5 year period, with the possibility of extension upon evaluation. Adjunct CEF Investigators will be members of the CEF Assembly that coordinates the research and teaching activities of the Cluster.

Eligible are outstanding scientists below W3 level pursuing independent research in an area relevant to the Cluster at the participating university faculties (Biology, Chemistry, Medicine and Physics) and research institutes (MPI of Brain Research, MPI of Biophysics, Georg-Speyer-Haus, and FIAS). Applications from junior researchers and from woman scientists are especially encouraged.

Applications will be evaluated by the CEF directors and ranked by the members of the CEF Scientific Advisory Board. Final decisions will be made by the CEF Assembly. The selection will be based strictly on scientific excellence.

Applications should include a one-page CV, complete list of publications, pdf files of the three most important papers, a two-page summary of research achievements and a three-page statement of scientific objectives and interest for the 5-year funding period of the Cluster. Applications should be directed by e-mail attachment to the directors of the CEF at office@cef-mc.de.

The deadline for complete applications is 31.12.2007.
